

## **DMAS Billing Instructions for Fractional Mileage billed on Air and Ground Ambulance Claims**

DMAS will continue to require fee for service ambulance claims and secondary Medicare ambulance claims directly from the provider to be submitted with mileage procedure codes to be rounded up to the next highest number. DMAS will only accept the claims with a decimal directly from Medicare (GHI). At this time, DMAS will continue to round up to the next highest number until our MMIS (claims system) is able to accept decimals.

DMAS will notify providers in advance when MMIS is able to accept fractional mileage on all ambulance claims.
